

Ministry of Education and Research  
Comrat State University  
Faculty of Economics

**REPORT ON THE ACTIVITIES OF THE  
FACULTY OF ECONOMICS**  
for the 2023-2024 academic year. year

Approved at a meeting of the Council  
of the Faculty of Economics  
No. 8 dated 21.06. 2024

Acting Dean of the Faculty of Economics,  
PhD, Associate prof.  
Todorici Liudmila

Comrat 2024

## **1. Organizational base of the structural unit of the faculty**

*a) Basic information (brief history: formation/authorization, accreditation, evolution, etc.)*

The Faculty of Economics is a stable and balanced developing structural unit of Comrat State University, conducting diverse applied scientific research and expert development of highly qualified teachers and practicing specialists in the field of economics and pedagogy. The faculty has been functioning since 1991, since the creation of the university itself.

The strategic goal of the faculty is to meet the growing demand of the national economy for the training of modern accountants and financiers, bank employees, professional managers, teachers of mathematics and computer science, who have knowledge and the ability to effectively apply it in the process of forming and implementing strategies at various levels, creating mechanisms and implementing technologies sustainable socio-economic development of the country, regions and enterprises.

Faculty of Economics, being a component part As part of KSU, it actively participates in the implementation of the Bologna process, providing conditions for the transition to three-level higher education (I cycle-licentiate, II cycle - master's degree), participates in the preparation and implementation of the Moldovan credit system, and takes part in international cooperation. The faculty carries out constant work in the context of improving the quality of education, creating transparency in the educational process, increasing the attractiveness of the faculty and KSU as a whole for all domestic and foreign stakeholders and partners.

The structure of the faculty operates and develops three departments: the Department of Economics, the Department of Accounting and Finance, the Department of Information Technologies of Mathematics and Physics.

The faculty provides an effective solution to educational, educational and pedagogical, organizational and methodological, research and information and analytical tasks for advanced training and training of specialists in accordance with state educational standards of higher professional education on the basis of an innovative educational environment, providing multi-level training of highly qualified personnel of the new formations in the field of economics, education, IT technologies.

Personnel training is provided by the following educational programs.

### ***Department of Economics:***

- I cycle of training - 0413.1 "Business and management", 1013.1 "Hotel services, tourism and leisure". Students are trained in the field of study 0413.1 "Business and Management" through full-time and part-time forms of study. In the direction of 1013.1 "Hotel services, tourism and leisure" as part of the stationary form of study.

- II cycle of training –041 "Business Administration", students are trained in this area within the framework of a stationary form of education.

### ***Department of Accounting and Finance:***

- I cycle of training – 0411.1 Accounting, 0412.1 Finance and Banking. Students are trained in full-time and part-time forms of study.

- II cycle of training 041 "Accounting and auditing in economic sectors", 041 "Corporate finance". Students are trained on a full-time basis.

### ***Department of Information Technologies of Mathematics and Physics:***

- I cycle of training –0114.02 Computer Science, 0114.02/0114.01 Computer Science and Mathematics, 0613.4 Computer Science (exact sciences)

- II cycle of training –011 Didactics of computer science, 011 Didactics of mathematics

The significance of the Faculty of Economics is determined by the demand for graduates, both in the economy of ATU Gagauzia and the country as a whole.

The faculty's teaching staff, as a creative community, is united by a common vision of the objective need for market reforms in the Republic of Moldova (including ATU Gagauzia (Gagauz Yeri), solving specific problems of social and economic development of economic entities, ATU Gagauzia, and the national economy as a whole.

In 2024, the Faculty of Economics successfully completed authorization for the 1st cycle of education in the Mathematics and Informatics program, as well as the submission of documents for authorization and accreditation in the field pedagogical sciences, "Informatics", Exact sciences "Informatics" and in the second cycle - master's degree: Didactics of Informatics.

*b) The mission of the faculty in accordance with the licentiate and master's programs (full-time, part-time courses);*

According to the Strategic Development Plan of the Faculty of Economics for 2022-2027. Mission of the Faculty of Economics is determined by the strategy of innovative regional development and consists in training highly qualified and competitive specialists in economic sciences, pedagogical sciences (computer science and mathematics) and in the field of IT in accordance with the requirements of modern educational standards, the requirements of the modern labor market and the needs of the national economy.

*c) The goals of the faculty in accordance with the licentiate and master's programs (full-time, part-time courses).*

Vision of the Faculty of Economics is a stable and balanced developing structural unit of Comrat State University, conducting diverse applied scientific research and expert development of highly qualified teachers and practicing specialists in the field of economics and pedagogy.

Strategic goal of the faculty – meeting the growing demand of the national economy for the training of modern accountants and financiers, bank employees, professional managers, mathematics and computer science teachers who have knowledge and the ability to effectively apply it in the process of forming and implementing strategies at various levels, creating mechanisms and implementing technologies for sustainable social economic development of the country, regions and enterprises.

This goal can be achieved based on:

- increasing the intellectual potential of the faculty and KSU, developing the research base of the faculty, increasing the professionalism of the teaching staff;
- ensuring the quality of the educational process;
- introduction of innovative methods of organizing the educational process, application of progressive educational technologies;
- forming cooperation with strategic partners;
- conducting scientific research and applied developments in various spheres of the national and regional economies, in the field of education and IT.

## **2. Implemented programs (qualitative and quantitative) and forms of organization**

### ***2.1 Cycle I, higher education licentiate (Table 2. 1)***

Faculty of Economics based on the results of the 2023-2024 academic year. 152 students graduated from the year, of which 123 students graduated from the licentiate, or 42% of the total graduation rate (44 full-time students, 79 part-time students)

### ***2.2 Cycle II, higher education master (Table 2. 2);***

Faculty of Economics based on the results of the 2023-2024 academic year. released 29 students of the 2nd cycle of master's training. In total, the Faculty of Economics accounts for 38% of the total output of KSU.

**2.3 Continuous professional training (mark the name of the program, year of approval, number of credits, form of certification, number of cadets) (Table 2. 3);**

**2.4 Other types of programs (if any).**

At the Faculty of Economics, new curricula have been developed and approved, in accordance with the following reference documents: Education Code of the Republic of Moldova No. 152 of July 17, 2014, Framework Plan for Higher Education Licentiate (I cycle), Master's degree (II cycle) and integrated education No. 120 dated 02/10/2020, Nomenclature of areas of professional education and specialties of higher education No. 482 dated 06/28/2017, external accreditation certificates 000047 and 000048 dated 11/20/2018. The department's curricula apply an interdisciplinary teaching model built on the relationship between theoretical and practical training, between current and continuing education, with the aim of: providing, on the one hand, an education that responds to the requirements and dynamics of the labor market, and on the other hand, excellent training supported by experts in the field, social partners - students and employers. The curriculum contains all the necessary elements to prepare a specialist in the target field. The goal of the educational program is to develop a set of knowledge, skills and competencies necessary for a specialist to effectively implement professionally in the labor market. The distribution of educational units and their weight in the formative component of the curriculum makes it possible to achieve the planned completion of the educational program. The curriculum is in line with the National Qualifications Framework and the European Qualifications Framework.

When developing a curriculum, the qualitative and quantitative characteristics of the educational program in the specialty are determined, including: volumetric parameters of the academic load in general, by year of study and by semester; a list of academic disciplines, professional modules and their components (interdisciplinary courses, introductory and practical training); volumetric indicators of preparation and conduct of state final certification, conditions for conducting a demonstration exam in the structure of procedures for state final certification.

Curricula are periodically reviewed and updated to meet the dynamics of the university qualifications market in order to meet the requirements of the beneficiaries of training, on the initiative of the department, the Quality Commission, social partners - employers, beneficiaries - students. Evaluation and modernization of curricula is carried out on the basis of the Regulations on the development, approval and modification of curricula.

New curricula are approved by the protocol of the department, transferring the extract of the department, the Quality Commission of the department to the Faculty Council, the Department of Quality Management and Educational Process and, finally, the Senate of KSU.

The need to adjust the approved curricula for specialties, replace outdated disciplines or introduce new disciplines is discussed and approved at a meeting of the department, then at a meeting of the Quality Commission, and additionally approved by the Faculty Council. The modernization of curricula is approved by the KSU Senate.

All curricula are drawn up taking into account the modern requirements of the Framework Plan for higher education: I cycle - Licentiate, II cycle - Master), correspond to the European Qualifications System;

An important aspect of the innovative development of higher professional education, acting as practice-oriented training, is its integration with the production sector. This is a factor in the adequacy of the results of the higher professional education system to the needs of production, the convergence of the personnel training process with the needs of various sectors of the economy and specific employers, and the provision of a connection between student training and future work in enterprises.

The constantly changing requirements of employers, caused by the emergence of new production technologies, require changes in the content of training in higher professional institutions. In this regard, the Department of Economics systematically conducts surveys with employers and students. Together with employers, a set of required professional competencies for training future specialists is being developed and adjusted, new disciplines and student training programs are being introduced. All this has an impact on the system of practical training of students, and the introduction of modern educational and information technologies makes it possible to train competitive and in-demand specialists in the labor market.

#### **2.4 Other types of programs (if any).**

Within the framework of the “InnoStart4NEET” project, conditions have been created to improve existing and create new social and labor services for youth, with an emphasis on young people of the NEET category and socially vulnerable youth of the ATU Gagauzia. A new program was developed aimed at assisting in employment and career guidance for youth, implemented through the Innovative Incubator "InnoCenter" at Comrat State University.

InnoCenter experts at Comrat State University have developed a short-term training program to increase the motivation and ability of young people to integrate into the educational process or the labor market.

This Program contains 3 modules:

- Vocational guidance (familiarization with the most popular and in-demand professions, passing testing for those wishing to decide on their choice of profession);
- Computer literacy (training in the use of Office programs, assistance in creating personal and work email, the ability to use national platforms for job search, rules for conducting email correspondence with a potential employer);
- Effective self-presentation (preparing a personal package of documents, CV and motivation letter, training in self-presentation skills).

Also at the faculty there is the Research Center PROGRESS

- The Center aims to make wider use of senior students in scientific research, including within the framework of license and master's theses.
- As part of their activities, the Center's employees may be reimbursed at the expense of the university for transportation costs within the Republic of Moldova.
- In its work, the Center can attract specialists and managers of enterprises and educational institutions of the region, republic, as well as colleagues from abroad.
- The Center organizes and conducts the Annual Student Work Competition in Economics
- Fulfills orders of economic entities for household purposes. contractual system.
- Provides assistance in the context of the development of interuniversity scientific cooperation
- Assists in organizing and holding conferences, round tables, symposiums.

### **3. Internal quality assurance management system**

#### ***3.1 Organization, implementation and effectiveness of the quality assurance system***

The faculty operates **Adviceon** quality, which is elected/re-elected and approved at a meeting of the faculty council. The composition of the Quality Council for the 2023-2024 academic year is chaired by T.D. Dudoglo, members of the council are M.F. Kara, S.I. Lupashku.

During the 2023–2024 academic year, the Quality Council carried out its activities in accordance with the developed and approved plan. The plan was implemented in all directions. A program and corresponding plans for conducting internal audits were also developed and approved, which were carried out within the appropriate time frame; the results of internal audits were discussed at committee meetings and reported to the management of the department and the teaching staff of the department, as well as to the faculty management. Corrective action plans and corrective measures were also drawn up, and inconsistencies were eliminated.

As part of ensuring the quality of education at KSU, educational activities and their monitoring are carried out in accordance with the Quality Regulations, which provide for an annual assessment of all types of work, including the implementation and updating of educational programs.

The Faculty of Economics conducts: internal audit, self-examination, self-assessment of educational programs, swot analysis, etc. Internal quality control of processes and resources management and their continuous improvement is carried out on an ongoing basis every year.

In 2023 – 2024 open classes were held according to the approved schedule.

Faculty teaching staff take part in all events related to the educational process. To assess the quality of graduates, employers are invited to the State Examination Committee, are heads of practice, are invited to conduct guest lectures or training sessions, etc.

- Analysis of the quality assurance work performed at the department and the results of internal audits.

The Quality Council carries out work in the following areas:

- ✓ control the implementation of decisions of the QMS at KSU;
- ✓ develop and implement documents (curricula, exam papers, etc.) in accordance with established requirements;
- ✓ promptly familiarize the teaching staff with newly introduced or updated documents;
- ✓ organize and conduct surveys at the Faculty of Economics
- ✓ check the academic journals of the Faculty of Economics (for completion of journals and certification);
- ✓ carry out monitoring of the quality of educational processes at the department level;
- ✓ conduct an audit for the availability of exam tickets and the dates of their use;

- ✓ monitor the curriculum according to the teaching load of the teaching staff;
- ✓ carry out consumer monitoring;
- ✓ conduct an audit of the availability of disciplines on the platform MOODLE;
- ✓ develop plans and goals in the field of quality to improve the level of the educational process and the satisfaction of students and undergraduates.

During internal audits conducted at the department, mostly minor inconsistencies were identified. Among the identified violations, the most common are the following:

- Journals of academic work are not completed in a timely manner;
- the intensity of the assessments is insignificant.

The nature of the inconsistencies identified during the internal audit is mostly minor. All inconsistencies recorded by internal auditors were included in the protocols, and were also taken into account and corrected.

Monitoring the quality of teaching disciplines is carried out through mutual attendance of classes according to the approved schedule and is recorded in the appropriate log of mutual visits. Faculty members of the department attend teachers' classes, evaluate the lessons conducted and record the results of the examination in the journal. Electronic educational resources are actively used in classes.

During the 2023-2024 academic year, group curators regularly (once every two weeks according to the schedule) conducted curatorial hours on a specific topic according to the developed plan. Issues of attendance and academic performance, relationships between students, between students and teachers, compliance with sanitary standards, and future profession were also considered.

The Faculty Quality Council noted that during the audit the staff demonstrated openness, interest in the objective results of the audit and contributed to ensuring that the purpose of the audit was achieved and the audit was carried out in full.

In order to improve the educational process at the faculty, during the month (March) of the second semester of the 2023-2024 academic year, an anonymous survey "Teacher through the eyes of students" was conducted on specialties of the Faculty of Economics. Students evaluated the work of the department's teaching staff for each teacher separately.

Also, in June 2024, the Quality Council conducted a survey "On the quality of organization and internship of students of the Faculty of Economics of KSU", "On the level of preparedness of students of the Faculty of Economics of KSU for professional activities."

The Department of Quality Management and Educational Process has developed a questionnaire to assess the quality of electronic courses; the questionnaire is available on MOODLE. Students fill it out at the end of the course.

At the end of the first semester of the current academic year, we analyzed the MOODLE questionnaires of first-cycle students. Full-time and part-time students participated in a survey regarding the quality of training and satisfaction with the organization of the learning process. Many questions in the survey touched on important aspects of the level of training organization. According to the majority of students surveyed, the course content corresponds to modern trends. However, students note some difficulties that arose during the course: solving tests with a time limit; Internet failures when accessing the course.

According to students, 90% of the course content corresponds to modern trends. However, students note some difficulties that arose during the course: solving tests with a time limit; problem solving; development of business concepts; Internet failures when accessing the course.

Students agreed 84% that they were satisfied with the course assessment tools and procedures. 85% of students report assistance from teachers during the course. Convenience and good course navigation satisfy students by 92%. Students noted internet failures, which made it difficult to complete tests.

Based on the results of the audit in the 2023-2024 academic year, the following conclusions can be drawn: in general, the work of the Faculty of Economics complies with the requirements of the ISO standard and planned activities, reporting documentation has been submitted, the audit is effective, the quality of the department is effective and maintained, there are opportunities to improve the quality of education.

In 2023 – 2024, propaganda work was carried out at the Faculty of Economics to attract applicants. Namely, career guidance events were held at KSU itself with the invitation of graduating students from lyceums, bankers, and practicing accountants: Quest "Journey to the country of finance and accounting" - April 28, 2024

On-site meetings with lyceum students of 12 classes of ATU Gagauzia, Taraclia, Bessarabka, Cahul, Hincesti.

The work of research centers contributes to the development of the potential of the Faculty of Economics:

1) Research Center "Progress" under the leadership of Dudoglo T.D.

2) Innovation incubator INNOCENTER, under the leadership of Kuraksina S.S.

Methodological work carried out at the Department of Economics is divided into:

✓ "educational and methodological work";

✓ "organizational and methodological work";

✓ "scientific and methodological work";

✓ "expert and methodological work."

In the learning process, the teaching staff of the Faculty of Economics pays special attention to the following educational technologies: personal-oriented technologies in teaching the discipline and information and analytical support of the educational process and managing the quality of education of students and undergraduates. The entire teaching staff actively uses the MOODLE electronic platform in the educational process, see table. 3.0 in the application.

The analysis of the functioning of the Quality Council at the faculty shows that all processes within the framework of the QMS process model are being implemented. The Quality Council ensures the quality of the educational process in accordance with the requirements and expectations of various consumer groups: the state, employers, students. The Faculty of Economics ensures its competitiveness and develops a quality management system in accordance with international standards. In order to ensure the quality of implementation of educational programs, the faculty implements an external audit procedure.

### ***3.2 Forms, methods and ways of organizing teaching/learning, aimed at improving the quality of the educational process.***

In the 2023-2024 academic year, teachers of the Faculty of Economics worked intensively to improve the forms and methods of teaching and learning technology for disciplinary courses. Faculty teachers use innovative teaching methods, which are used both for open classes and for everyday ones. They include:

1. Lectures-presentations;
2. Lectures with videos;
3. Practical exercises with analysis of used video materials on the topic;
4. Binary lectures;
5. Classes using modern innovative technologies.

Individual work with students at the Department of Economics is carried out in two directions:

1. Organization of work with students who strive for a deeper study of disciplines;
2. Organization of work with students who have problems with their academic performance.

One type of individual work is the creative activity of students. In the process of performing a creative task, students prepare messages, reports, presentations, write and defend abstracts on the topics being studied. Individual work assignments are posted by teachers on the Moodle platform.

When working with underachieving students, types of tasks are developed that maximize the activity of work and awaken the need for cognitive activity. When working with them, it is important to use methods that are accessible and interesting to them. To organize the learning process with such students, department staff constantly select the content and forms of presentation of educational material. Particular attention is paid to: solving problems, increasing the practical component of tasks.

In individual work with students who have problems with their academic performance, the following work is performed:

✓ The group supervisor and the head of the department are notified (at the discretion of the head of the department, the student's parents are informed directly about low academic performance) if there is an accumulation of debts and unsatisfactory grades.

✓ According to the duty schedule of the teaching staff at the department, consultations are held, and if necessary, work is also carried out with students in their free time.

The introduction of ICT into the content of the educational process implies the integration of various subject areas of economics with computer science, which leads to the informatization of students' consciousness and their understanding of the processes of informatization in modern society. In the modern methodological system of the university, more and more new information technologies are appearing, and graduates are prepared to master new information technologies in their future careers.

Innovative forms of work:

- media games (goal: to provide more visual information in a short period of time)
- electronic presentations
- media panoramas.
- MODLE platform

In the learning process, the faculty pays special attention to the following educational technologies: personal-oriented technologies in teaching the discipline and information and analytical support of the educational process and managing the quality of education of students and undergraduates.

1. Educational work carried out with students:

1. Conducting Quests, competitions of business ideas, subject Olympiads;
2. Conducting on-site seminars at enterprises in various sectors of the ATU Gagauzia;
3. Activities of group curators, including:
  - a) Conducting scheduled supervisory hours;
  - b) Conducting thematic curatorial hours;
  - c) Conducting curatorial hours with the involvement of specialists from various bodies (insurance, law enforcement, medical)
4. Organizing students to participate in ceremonial events dedicated to social events and important dates held at the university throughout the year;
5. Organization of joint research work of 3rd year students with the teaching staff of the department;
6. Familiarization of students with the schedule of coursework (CR) in the disciplines of the department and conducting instructions on their writing and design during the year (leaders of the Kyrgyz Republic);
7. Educational work in classrooms;
8. Generating ongoing reports on academic performance and attendance throughout the year

In the 2023-2024 school year. Numerous open lectures were held within the framework of the Progress Center this year. All information is reflected on the university website.

Lesson plan, topics of practical work that are considered in seminars and laboratory classes, learning outcomes - specific competencies and blocks of competencies for each topic, assignments, assessment methods are provided in the curriculum. Courses and seminars are interactive, based on constant dialogue between teachers and students, which stimulates student thinking and creativity. Seminar activities are also based on the consolidation of theoretical knowledge, case studies, portfolios and projects.

Depending on the form of organization of educational activities, consultations with students are carried out flexibly. During academic classes, dialogues are organized with students using classical and non-traditional methods. During practical classes (seminars), consultation is practiced: individually with each student, with a group of students (in cases of joint activities).

The student-centered orientation of teaching-learning methods is visible both at the level of developing the discipline's curriculum and at the stage of implementing the teaching-learning-assessment triad. Students are informed about the content of the program, are involved in the formation of their educational program by choosing subjects offered as electives for current specialization in the labor market, specific training in the conditions of internationalization and changes in the local professional context, etc. Students are consulted on their educational choices and their views on the further implementation of the curriculum and subject/module curricula are explored.

Ongoing counseling of students when performing individual work is carried out outside working hours, at the time specified in the work schedule, and at other times convenient for the graduate. During consultations with students, special attention is paid to independent research (reports, scientific articles, individual and group projects, essays, etc.), completing various tasks, and self-assessment of educational achievements.

At all stages of the educational process, students of the department can receive consultations organized by the teaching staff, according to the schedule approved by the department.

In order to continuously improve this process and ensure the effective use of ICT tools in the teaching-learning-assessment process, these aspects are included in the agenda of the responsible quality assurance structures and are considered at meetings of the department, faculty council and senate. All disciplines/modules in the curriculum are suitable for the use of interactive methods using ICT, the main objective of which is to focus learning activities on the student. The curriculum courses are hosted and accessible to students on the Moodle platform.

### **3.3 *Practical internships***

The practice provided for by the curriculum for the specialties of the Faculty of Economics, being a mandatory component of the professional training of a specialist, is aimed at applying in practice the theoretical knowledge acquired by students within the framework of the curriculum.

During the training, the following types of internships are provided: introductory, production and licensing, professional.

During the internship, students become familiar with the basics of their future specialty and acquire primary skills for professional training. The internship is carried out in an economic entity of the country, the profile of which is compatible with the profile of professional training. The practice is carried out on the basis of agreements concluded between KSU and business entities.

The permanent bases of practice are: SRL "DolayTrans", SRL "GBA-Trans", SRL "Chiupon", SRL "Fabrika Oloi Pak", SRL "Moncomtex", UCCG "GAGAUZSOOR", SA "Tomai-Vinex", SA "Iugintertrans", SRL "Moncomtex", SA "Iugintertrans", Mobiasbanca-OTR Grup, SA FinComBank BC, BC "Moldova Agroindbank" SA, BC "Moldindconbank" SA, SRL "Timboi Grup", Gagauzia Mayor's Office and Health Centers, ATU Gagauzia schools, "MARC-MEDIA" SRL, IM "VitaPharm", etc.

Introductory, industrial practice is carried out in the form of a student's work organized by the supervisor from the university and the enterprise/bank, aimed at familiarizing himself with the features of professional work, including the performance of one-time and permanent tasks.

According to the requirements of the guidelines for completing introductory and industrial internships, students analyze the organizational structure of management, provide a general description of the enterprise and complete an individual task.

The purpose of conducting introductory practice in the specialty is to consolidate, expand and deepen the acquired theoretical knowledge and acquire initial practical skills in solving specific problems. Students acquire skills in solving complex problems and master various types of future professional activities.

By During licensing practice, practice supervisors together with the student develop a plan for completing tasks that is consistent with the approved plan for performing licensed work.

Target practice in the specialty - consolidate and deepen the theoretical knowledge acquired by students in the process of studying general professional and special disciplines, developing professional competencies and practical experience in the specialty, collecting factual material for performing licensed work in the future. This goal is achieved as a result of familiarization with the work of the enterprise, the acquisition of skills in professional and organizational activities in the workplace, and participation in solving practical problems. Practice in the specialty of students is carried out at enterprises, institutions and organizations and is intended for them to gain practical skills in working at a chosen enterprise in a position corresponding to the profile of the specialty.

The practice also solves a number of specific tasks, such as: student adaptation to real working conditions in various institutions and organizations, gaining work experience in work teams, planning work in an organization, communication and communication in the field of future professional activity.

The goals, objectives and content of all types of practices are reflected in the curriculum and methodological guide to practice, and correspond to the requirements of the curriculum for the specialties.

Curriculums and methodological guides to practice are developed and approved by the department, and then by the Faculty Council.

The assignment of students to practice is carried out on the basis of the presentation of the department and the order of KSU on internship and placement of students. Control over the internship is assigned to the educational department of KSU and the department.

The head of practice (department teacher) bears personal responsibility. Monitoring of practice is carried out regularly and includes: informing students about the goals of practice and assessment criteria, involving students in self-assessment based on criteria, providing feedback to help students determine their further actions and how to implement them. The supervisors instruct students on practice. The order of practice, organization and conduct of practice are defined in the Regulations on the practice of students of Comrat State University.

There were no violations of the supervisor's requirements by students during internships.

During internships, students keep a daily "Internship Diary" and complete tasks provided for by the internship programs. Based on the results of completing all types of internships, students draw up a report reflecting the results of completing the assigned tasks.

The completed reports were submitted to the departments for verification by the supervisor and for further protection. The defense of practice reports was organized by a commission at the university.

Students and undergraduates can do internships in various organizations (state, municipal, public, commercial and non-profit). As a rule, the practice bases are specific enterprises of ATU Gagauzia and the Republic of Moldova. When choosing a place for internship, preference was given to enterprises with a clearly regulated and developed system of financial, economic activity and management.

According to the terms of the concluded internship agreements, all students were assigned practice managers from enterprises. These are mainly highly qualified specialists, ch. accountant, ch. economists, heads of departments who provided practical assistance to students in analyzing and studying the functional activities of each department.

The heads of practice from the enterprise provided each student with a description. In the characteristics of the students, positive feedback was given about the theoretical preparedness of the students, a description of the professional skills they acquired. Before leaving for practice, students received instructions. During the internship, students' work was checked at the practice sites.

Information on internships by department is presented in Tables 3.1,3.2,3.3.

### 3.4 Assessment of academic results

Teachers of the Faculty of Economics are actively involved in educational, methodological, research, organizational and educational activities.

The distribution of hours across semesters allows students to have time for individual preparation (writing coursework, tests, participating in research work).

During the study of disciplines, one or two certifications are provided, carried out in written form.

Faculty examinations for the 2023-2024 academic year were organized mainly in written form in the form of a ticket; the composition of the ticket was mainly formed from two theoretical questions and one practical task or test.

Mechanism for calculating the final grade  $CO = (T+A)/2$

where: T – current assessment;

A – certification;

CO – average rating.

Total for full-time education = (Average grade \* 0.6) + (Exam \* 0.4)

Total for distance learning = (Average grade \* 0.5) + (Exam \* 0.5)

When assessing students' knowledge, transparency of the assessment is ensured, at the first lecture, students are introduced to the basic requirements for the current and final assessment, each seminar ends with the announcement of grades for the lesson, and the evaluation of examination papers is included in the curriculum and annotations for the disciplines.

At the Faculty of Economics, organizing and conducting State exams are at the proper level. The exams started on time, according to the approved schedule, there were no disruptions.

The graduating departments carried out the necessary preliminary work to conduct state exams (including review lectures), which ensured a sufficient level of preparation for students to pass licensing exams. State examinations were conducted using specially prepared examination papers; the range of questions that met the requirements of the standard for taking an oral examination reflected new achievements in science and changes in legislation.

At the faculty, across departments, preliminary defense of master's and license theses was carried out, which helped to identify work performed at a low level, eliminate deficiencies and increase the level of protection.

During the period of work of the state commission from May 30 to June 15, 2024, there were no

complaints or claims from students or the teaching staff of the University.

The defense of theses and master's theses showed that graduates are able to successfully use modern information technologies, methods of obtaining, processing and storing information.

Graduates understand the essence and social significance of their profession, know the main problems of work in a specific area of their activity and offer practical approaches to solving these problems.

#### 4. Academic staff

*4.1 Analysis of the teaching staff who ensure the implementation of training programs (Table No. 4.1, 4.2);*

## 5 Information about students

### 5.1 General information (tables from the appendix)

- a) Student population (according to Anexa 4);
- b) Dynamics of the student population (according to Anexa 5);
- c) Student assessment (according to the appendixAnexa 6, Anexa 7);
- d) Record of orphan/disabled students (according toAnexa 8);
- e) Record of students from Transnistria and the city of Bender (according toAnexa 9);
- f) Providing students with places in the dormitory (according to the appendixAnexa 10);

### 5.2 Student self-government.

### 5.3 Extra-curricular activity;

During the 2023-2024 academic year, group curators regularly held supervisory hours, organized visits to the Investment Forum, meetings with bank representatives, and meetings with employers.

12/29/2023 Velikova T.G. organized the Mobile Quest MobiQuest for students under the project “MobileEduTeachVoyage: a journey into the world of education through mobile technologies,” which was implemented under the Tekwill Ambassadors 2023 program, in which students from groups IM-20, IM-22, I-21 took part.<https://kdu.md/ru/item/4289-29-dekabrya-2023-byl-organizovan-mobilnyj-kvest-mobiquest>

5. 12/27/2023 at Tekwill Comrat Velikova T.G. held a Discussion Club on the project “MobileEduTeachVoyage: a journey into the world of education through mobile technologies,” which was implemented under the Tekwill Ambassadors 2023 program.

6. Participation in the hackathon On April 28, 2024, the team of Comrat State University took part in the Regional Technological Mini-Hackathon “Innovations in Agriculture, Tourism and Winemaking”. The team included students of the Faculty of Economics (Peju Vasily gr. IM-23, Gradinar Nikita, gr. IM-20, Gaidarzhi Kirill, gr. IM-22, Germek-Cholak Victoria, gr. ETU-23).

Faculty teachers organized the supervision of students’ scientific work to participate in the International Competition of Student Works in December 2023.

The department, in collaboration with the student research laboratory “Economist-Researcher”, conducted the Quest “Across Financial Spaces” in April 2024, involving 12th grade students.

At the Faculty of Economics in April 2024, the Quest “Journey to the Land of Finance and Accounting” was held, with the involvement of 12th grade students, organized by the Department of Accounting and Finance.

The Inno Center organized and held a Business Ideas Competition. The Faculty of Economics actively collaborated with the Oryol Institute in the Business Ideas Competition.

Also, the Faculty of Economics took an active part in the International Competition of Student Works in Economics, organized by the Progress Research Center.

#### **5.5 Forms and methods of professional guidance for students. Employment of students.**

In order to provide high-quality professional education, the department paid special attention to the development and updating of information material about specialties. The promotional material contains the information necessary for the applicant and is attractive in its design. Modern booklets have been developed.

An intellectual game was also organized with the participation of graduates of lyceums and colleges.

Visited by teachers from the lyceums of the ATU Gagauzia, Bessarabka, Hinceshti.

Student attendance at career guidance events IT CAREER EXPO 2023 (Chisinau) at the national level.

Students of the Department of Information Technologies, Mathematics and Physics under the guidance of Doctor, Conf. Univ. Velikova T.G. took part in the IT CAREER EXPO 2023 event - the largest event on career guidance in the technology sector, which took place on September 30, 2023 in Tekwill, Chisinau. IT companies presented information on internships for students and open vacancies. The organizers thought through everything to the smallest detail: themed workshops, quizzes, lotteries, competitions. For the second year, students of the Department of Information Technology, Mathematics and Physics have been participating in this event. This year, 16 KSU students took part in the event: students of group IM-22 (II year), group IM-23 (I year), group I-21 (III year), group EF-21 (III year), group Yu -23 (I course).

Student attendance at career guidance events IT CAREER EXPO 2024 (Comrat). On April 10, 2024, the IT Career Expo 2024 exhibition, organized by Tekwill Comrat, was held within the walls of Comrat State University. Students learned about the opportunities that have been created in the Republic of Moldova for training, internships and employment in IT companies. IT companies took part in the exhibition: Simpals, Allied Testing, Tochka Rosta, Power IT, DRON Assistance, Tekwill Academy Kids. The Faculty of Economics actively participated as a participant in the exhibition. The ITMF Department, the Department of Economics and the Department of Accounting and Finance prepared materials for the guests of the exhibition (flyers about specialties with detailed information about training opportunities at KSU and specialties), a presentation about projects implemented jointly with Tekwill and initiatives in which KSU previously participated. Students from the ITMP department helped with the design of the stand and presentation of materials. Velikova T.G. was invited as a mentor for a master class on the topic "AR&VR". Publication on the KSU website:<https://kdu.md/ru/struktura->

## **6. Social partnership**

- forms of cooperation;
- partners (number of agreements, domain, etc.).
- forms of cooperation;

Cooperation with TekwillComrat (participation of students in events organized at TekwillComrat and at Tekwill Chisinau).

- Informing teachers, students about events, participating in and organizing events in cooperation with Tekwill).

- Assistance in organizing the participation of students from all 4 faculties in the event on November 29, 2023 "Between us IT Girls" with the support of the Embassy of Japan, ATIC, Tekwill, UN Women at the Tekwill center at KSU.

- Velikova T.G. Participation in the event for girls on January 25, 2024 Ceremonia de încheiere a proiectului „Consolidarea rezilienței socio-economice a femeilor și fetelor afectate de criza refugiaților din Ukraine in Moldova”, Organizer UN Women in Tekwill, Chisinau, together with group students IM-23, IM-22, EF-21.

Cooperation with the State Educational Institution Gagauzia (participation as a jury in competitions).

- The first Regional IT Olympiad among students of Gagauzia in the direction of "Web design and website development". Velikova T.G., Lupashku S.I. - members of the jury, April 13, 2024 at Tekwill Comrat, [Publication on the State Educational Institution website](#)

- Competition of research projects of students of educational institutions of Gagauzia on the topic "Search. Research. Discoveries", direction "Information and communication technologies". Velikova T.G., Popil G.P. - members of the jury. Participants: Students of the ATU Gagauzia in grades 8-12.

Regional Olympiad in Informatics Popil G.P. member of the jury.

Preparing the UTAG Team for the Republican Olympiad in Informatics Popil G.P. December - January.

Cooperation with gymnasiums, lyceums of ATU Gagauzia(on-site master classes conducted by Velikova T.G. in partnership with TekwillComrat).

● Visiting master class at PU TL named after. G.A. Gaidarzhi, Comrat, December 18, 2023 as part of the MobileEduTeachVoyage project under the Tekwill Ambassadors program Post on Facebook

● Visiting master class at PU TL named after. B. Yanakoglo, p. Kopchakas part of the MobileEduTeachVoyage project under the Tekwill Ambassadors program Post on Facebook

● Visiting master class at the Regional Sports Lyceum-Boarding School, Comrat, which was visited on December 12, 2023 as part of the MobileEduTeachVoyage project under the Tekwill Ambassadors program Post on Facebook

● Visiting master class to the gymnasium named after. V. Topal, p. Kongaz., December 11, 2023 as part of the MobileEduTeachVoyage project under the Tekwill Ambassadors program Post on Facebook

● October 24, 2023 Organization and conduct of training by Velikova T.G. on the use of mobile applications for teachers of ATU Gagauzia within the framework of the MobileEduTeachVoyage project, Tekwill Ambassadors 2023 <https://kdu.md/ru/struktura-universiteta/fakultety/ekonomicheskij-fakultet/kafedra-informatsionnykh-tekhnologij-matematiki-i-fiziki/novosti-kafedry-itmf/item/4080-v-ramkakh-proekta-mobileeduteachvoyage-byl-proveden-trening-po-ispolzovaniyu-mobilnykh-prilozhenij-dlya-uchitelej-ato-gagauzii>

Cooperation with the public organization NEXT. Conducting professional trainings by department teachers for entrepreneurs.

Active cooperation with the National Bureau of Statistics in organizing and conducting the Population Census.

Cooperation with bank branches and enterprises of the ATU Gagauzia on internships for students of the department.

**On 02/20/2024** at Comrat State University st. Galatsana 17, Comrat on Economic Faculty held an open lecture on the topic: “How to avoid excessive debt?” **speaker Marina SOLOVIOVA**, program director, Expert-Grup.

The lecture was organized by the Center for Independent Analytics (Centru Analytical independent) “Expert-Grup”. During the lecture, the following issues were discussed: the advantages and risks of lending; dynamics of the volume of loans issued to individuals; requirements for responsible lending; what can we do to avoid over-indebtedness.

During the lecture, students were active, asking questions to representatives of the center in the field of finance.

Following the meeting, an interesting quiz was organized for students to assess their knowledge on the topic of the open lecture, and the results of the meeting were also summed up.

**November 17, 2023** at 13:00, in room 106, a public lecture was held at Comrat State University on the topic: “Modern banking product”. The event, organized by FinComBanc in collaboration with the Department of Accounting and Finance, was devoted to the following issues:

- security of financial transactions;
- conscious lending to individuals;
- correct determination of the full cost of the loan;
- DAE, etc.

Speakers:

Dan Rusu - Head of FinComBanc Digital and Card Transaction Monitoring Service,  
Vitaly Tsvyatkov – Director of the FinComBanc branch, Comrat.

The management of FinComBanc once again provided assistance not only in the education and training of specialists graduating from the Department of Accounting and Finance, but also provided the opportunity for practical internship and employment.

November 1, 2023, within the framework of the signed agreement, the rector of KSU - Zachariah S.K. and the head of the Technovator organization represented by Erhan M, a guest lecture was organized within the walls of KSU for students of all faculties.

The speakers were:

**Vitaly Petrosyan**- Successful entrepreneur with experience in the IT industry. The speaker shared his personal experience of running a business, talked about the opportunities and threats of its development, explained how to find investors, develop an idea and promote it.

**Lydia Demeanyuk**- Director of the B2G department at Simpals SRL. She inspired students - future entrepreneurs with her example and success stories. Students learned how to find a good idea, what a startup is and how one can be launched.

During the guest lecture, students actively asked interesting questions in the field of entrepreneurship, and were also interested in the possibility of internships and joint project work in the future.

Students were introduced to the "Speed Accelerator" program - a dynamic and intensive 5-week program designed for students to turn their innovative ideas into viable ones.

Round table on the topic: "Prospects and opportunities for the IT profession," April 26, 2024 [The publication was published on the KSU website, Publication on KSU Facebook.](#)

#### Cooperation with professors from abroad.

On 04/16/2024, an open lecture by Mr. was held at the Faculty of Economics of Comrat State University within the framework of Erasmus + Learning Training Mobility. Emrah ÖZDEMİR Branch Manager Health Culture and Sports Branch Directorate Financial Budget Branch Directorate Sivas Cumhuriyet University on the topic: "Economic specialties as the key to success"

The lecture was attended by students and teachers of the Faculty of Economics. During the lecture, students were active, asking questions to the lecturer in the field of finance and economics in general. Also during the lecture, the prospects for studying economics were discussed, and the importance of acquiring economic skills and competencies in a market economy was emphasized.

The faculty cooperates fruitfully with Prof. Dr., Adrian Adăscăliței, Universitatea Tehnică "Gheorghe Asachi", din Iași, România. the professor sends information on conferences, sends educational and methodological publications in electronic format, participated as a moderator of the section of Information Technologies, Mathematics and Physics together with Velikova T.G., dedicated to the 33rd anniversary of KSU.

Cooperation with ARR ATU Gagauzia Velikova T.G. took part in the work of the working group on August 24, 2023 Smart Specialization of the development region of the ATU Gagauzia. The working group on Smart Specialization of the region, represented by regional experts from local government authorities, science, business, non-governmental institutions, the first meeting of which took place in the office of the ATU Gagauzia RDA.

## **8. Conclusions**

The analysis of the functioning of the Faculty of Economics for the 2023-2024 academic year shows that all processes within the framework of the educational process are being implemented. For all declared specialties of the faculty, declared self-assessment reports were prepared.

The Faculty of Economics ensures the quality of the educational process in accordance with the requirements and expectations of various consumer groups: the state, employers, students. The Faculty of Economics ensures its competitiveness and develops a quality management system in accordance with international standards. In order to ensure the quality of implementation of educational programs and the learning process in general, the Faculty of Economics carries out an external audit procedure by the dean of the faculty and the Quality Council. In order to ensure the development and activation of scientific processes, the Faculty of Economics has a Science Council.

In order to effectively operate the quality of university education, it is necessary to:

- regularly conduct training seminars and conversations with department employees, including quality officers on the functioning and improvement of the university's education quality management system.

- expand the use of guest lectures, seminars, workshops, tests in the specialty of potential employers and practicing professionals in the curriculum.

- ***difficulties at work;***

1. Difficulties are caused by outdated technology and the lack of a licensed version of the 1c - accounting program.

2. Due to a certain number of students employed due to financial problems in the family, student attendance is one of the big problems and it has turned out to be quite difficult to regulate this process.

3. The limit established for refilling cartridges in printers, as well as for issuing paper to the department, does not at all correspond to the normal provision of the educational process.

4. There were suggestions from students that they would like, when studying philosophy, to study philosophy in economics in more detail.

5. For authorization and accreditation of programs, they urgently began to request curriculum in Romanian. It is advisable to defend the position that requiring curriculum in Romanian, if the discipline is taught according to the curriculum in Romanian, if the discipline is taught in Russian, then in this case the requests are not justified.

6. The ITMP Department sent Proposals for the Regulations for posting information on the official website of Comrat State University (KSU) by university departments, on which one of the issues that is painful is paragraph 3.5.1 Text materials: - information in the form of a test must be meaningful and interest the reader news or discovery; written correctly in four languages (Gagauz, Romanian, Russian, English) (Turkish and German are allowed);

Translating publications into 4 languages demotivates employees to publish after events, since for each event it is necessary to deal with the difficulties of translation. Participation in events and organization of events as such causes fewer problems than translating into 4 languages. The proposal remains in force that events that are organized as part of international projects, as well as those that are significant for external partners, as well as publications on events included in the ANACEC register, must be translated into 4 languages.

***proposed solutions (indicating implementation/solution levels).***

1. Find funds for the university for printers, a laboratory assistant's computer, as well as the purchase of the 1c program - accounting (Administration)

2. Be more attentive to students from the category of those for whom it is not possible to fully attend and set an additional retake schedule for them (Departments, Faculty)

3. Review the limits on paper issuance and cartridge refills (Administration)

4. The discipline "Philosophy" should be renamed "Economic Philosophy" (Department, Faculty, Senate)

**9. Information about specific results achieved in the current academic year**

The Faculty of Economics reacts dynamically, constantly updates and introduces innovative teaching technologies, forms and methods based on a competency-oriented approach to the professional training of specialists.

The areas of work are: development of practical skills of students, - organization of practices, invitation of leading experts in this field;

- organization of mutually beneficial cooperation with potential employers;

- creation of permanent working groups at the department that monitor and improve individual educational units;

- creation and development of the department's website, placement of educational and methodological materials on it.

Faculty scientists are conducting active research work in the scientific direction of the department. The Progress Scientific Research Center operates under the leadership of Professor T.D. Dudoglo. Student laboratory "Economist Researcher", under the leadership of V.I. Kyurkchu, Innocentre under the leadership of the head of the department, S.S. Kuraksina The contribution of center members to the innovative development of ATU Gagauzia is highly appreciated at various levels and has received public recognition.

The teaching staff of the faculty carried out work on the development and coordination of programs and strategies for the region.

Members of the team work closely with foreign scientific and educational institutions. The studies are united by a common scientific methodology aimed at shaping economic policy.

The faculty staff takes part in regional, republican, international programs and projects, as well as in events held by KSU.

The Faculty has a positive reputation at the level of the University and the region, develops interaction with professional organizations in the field of economic and management activities (consulting companies; educational organizations, manufacturing companies).

The Faculty of Economics successfully conducted continuing education courses for didactic staff - mathematics and computer science teachers.

Teachers of the Faculty of Economics have published various manuals.

Students on the Moodle platform evaluate the course and make recommendations, which made it possible to identify technical and organizational problems.

Teachers of the ITMF department advise KSU faculty on working on the Moodle platform.

The ITMP department successfully conducted continuing education courses for teaching staff - mathematics and computer science teachers.

The teaching staff of the departments updated the curriculum and added FIȘA UNITĂȚII DE CURS to the curriculum.

Teachers participated in exhibitions held at the national and regional levels:

Development of posters for the Exhibition of Research Works and Projects 11/10/2023, dedicated to the World Science Day for Peace and Development <https://kdu.md/ru/struktura-universiteta/fakultety/ekonomicheskij-fakultet/novosti-fak-ekonomiki/item/4114-vystavka-nauchno-issledovatel'skikh-rabot-i-proektov-priurochennaya-k-vsemimomu-dnyu-nauki-za-mir-i-razvitiu>

Scientists of the department are conducting active research work in the scientific direction of the department. The Progress Scientific Research Center operates under the leadership of Professor T.D. Dudoglo. and also created a scientific student laboratory "Economist-Researcher" under the leadership of V.I. Kyurkchu.

The teaching staff of the department carried out work on the development and coordination of programs, regulations and strategies of the university and the region.

Members of the team work closely with foreign scientific and educational institutions. The studies are united by a common scientific methodology aimed at shaping economic policy.

The team takes part in regional, republican, international programs and projects, as well as in events held by KSU.

Various manuals were published by teachers.

Students on the Moodle platform evaluate the course and make recommendations, which made it possible to identify technical and organizational problems.

Todorici Lyudmila, Doctor of Economics, conference lecturer, participated in the mobility program Erasmus+ mobility at Sivas Cumhuriyet University [R SIVASO1], Turkey. MOBILITY SCOPE: ERASMUS+ KA107 ICM LL Ly MOBILITY TYPE: STAFF MOBILITY FOR TRAINING (STT) RES.

Teachers constantly improve their skills and engage in self-education through attending courses, trainings, and webinars.

*Acting Dean of the Faculty of Economics Todorici Lyudmila*
