

## REQUIREMENTS FOR THE DESIGN OF MATERIALS

1. The order and rules for the design of the main elements of the article:
2. Last name and initials of the authors separated by commas: the last name must first appear in the line, then the initials; Information about the organization: first specify the name of the organization, the city, then the country; The title of the article; Abstract 70-120 words; Keywords are separated from each other by a semicolon; Information is provided from 4.2 to 4.6 paragraph in English with the same text parameters. The text of the article should contain such structural elements as: introduction, the purpose of the study, the main part, the results obtained, conclusion; Acknowledgements: who supported the scientific research, scientific consultant, head of scientific work, etc. List of bibliographies in languages; Information about each author individually in English: full name, academic degree and title, place of work and position, e-mail.
3. Files in doc, docx formats are accepted.

Articles are REJECTED in the case of:

violations of the requirements for their registration and submission deadlines, in particular, in the absence of a clear structure of the article; when the level of originality of the text is below 70 %; when submitting previously published results, as well as when describing available schemes and sequences (for example, reviewing documents, the structure of management bodies) as research results. Rejected articles are not considered and are not sent back.

The editorial board does not enter into discussions with the authors. Grandfather-line Acceptance of articles until October 20, 2023. Review – until November 20, 2023

The publication of the book is until December 30, 2023.

## REQUIREMENTS FOR THE DESIGN OF THE ARTICLE

The materials must be submitted in a Word text editor. The size of the margins is 20 mm each; portrait orientation of the page; automatic hyphenation; text alignment in width; bibliographic lists; keywords and summaries; structure: relevance, literature review, goals, objectives, objects and methods of research, results and discussion, references; references to literature in the text - in square brackets indicating the number in the list of references, for example, [1]; put a period after square brackets; the list of references is formed in alphabetical order by the surname of the authors one interval after the article. The order of the text: the title of the article (in bold Arial 12 capital letters in the center); the next line after an interval of 1.15 in bold Arial 12 lowercase font - the surname and initials of the author; the next line after one and a half intervals in Arial 12 font - the position, initials and surname of the supervisor, if there is one. The next line through

## OPTIONS FOR COORDINATION WHEN ESTABLISHING COMMUNICATIONS BETWEEN DIFFERENT POWER SYSTEMS

**Ivasevich Z.V.**

Scientific supervisor Associate Professor V.I. Demidov  
*National Open Institute St. Petersburg, St. Petersburg, Russia*

A brief overview of the systems of interaction of state and public authorities within the borders of the Russian Federation is given. The analysis of the receipt of documentation to various bodies and departments was carried out. The conclusion is made about the introduction of electronic information resources to accelerate and simplify data exchange.

*Keywords:* public authorities; development; electronic information resources; powers; electronic document turnover system.

Every year, the amount of information and official correspondence exchanged by state authorities, public authorities - which include local self-government bodies (OMSU), ministries, departments for the implementation of various state and interdepartmental programs, goals and objectives is steadily growing...

Table 1. Dynamics of forest resource areas of Dong Nai Province of Vietnam

Categories of forest lands	Area of forest lands by years of research			
	2010	2015	2021	2021 compared to 2010
I – By methods of creation	545026.34	554607.9	595042.92	+50016.58/+9.18
1. Natural forests	386045.6	384221.5	393359.94	+7314.34/+1.89
